About Monival

Summary about Monival

Gain insights into projects and strategic plans

Report efficiently and effectively

Collaborate with your team and external stakeholders

Features

- 🔗 **Strategic performance management** - Centralizing portfolio, project and program information presented on summary dashboards for your organization
- 🔗 **Formalize (standardize) processes and controls for measuring performance** and outcomes across your organization - Template objects that cascade down and roll up the reporting structure of programs and projects for consistent planning and reporting
- 🔗 **Easily and quickly align to evolving interventions, project priorities and environmental analysis** - Ranking and prioritization of initiatives for better resource planning
- 🔗 **Collaboration and accountability** – Role based planning, re-planning, approval workflows chatting and global planner for staff activities e.g. trips, training, leave etc.
- 🔗 **One stop shop for projects and plans data** - Upload of files and documents such as contracts and portfolio of evidence
- 🔗 **User friendly** - Fluid navigation across personalized landing page, views and reports
- 🔗 **Enhanced decision-making from real-time and consolidated reports and dashboards** - Seamless integration to grass root project data collection for real-time analysis
- 🔗 **Integration to existing systems** – Monival can be integrated to existing financial systems such as Dynamics Nav for budgets, Microsoft SharePoint, Onedrive and Google Drive for document management and storage

Plan

Plan efficiently with Monival

Monival allows you to **create your project plan or strategic plans** with support for **multiple workflow stages** including the inception stages and the review of the proposed plan; set targets and **collaborate with many users**

Features

- 🔗 **Ideation Process** – Discuss with stakeholders on project ideas through the messaging module
- 🔗 **Proposal Workflow** – Review and approve proposals
- 🔗 **Create your plans** - based on organization templates and with *approval workflow*
- 🔗 **Capture Results and Statements** - Such as Goals, Objectives, Outcomes and other Results
- 🔗 **Capture Key Performance Indicators (KPIs)** – Such as your Impact Indicators, Outcome Indicators, Financial or Customer Metrics
- 🔗 **Give permissions to the team and stakeholders** - Who are involved with the plan
- 🔗 **Capture Values** – Such as Baselines, Targets and Budgets
- 🔗 **Re-planning** – Once project is in execution stage, the project manager can re-plan and have different versions of plans

The screenshot shows the Monival web application interface. The top navigation bar includes the Monival logo, a menu icon, and the 'Plans' section. The main content area displays a 'Welcome to Monival!' message and a 'Create New Plan' button. Below this is a table of users with the following data:

Organization User	Date Registered	Role	Status
Samppa Nori	2012/01/01	Member	Active
Estavan Lykos	2012/02/01		
Chetan Mohamed	2012/02/01		
Derick Maximinus	2012/03/01		
Friderik Dávid	2012/01/21		

A 'New Plan' modal form is open in the foreground, containing the following fields:

- Title *
- Description *
- Plan Type *
- Planned Start Date*

The footer of the application shows 'Copyright © 2018 by Sibasi Ltd.'
